

An aerial photograph of a large industrial complex during sunset. The sky is filled with warm, orange and yellow light, with some white smoke or steam rising from the buildings. The facility consists of several large, light-colored industrial buildings with various pipes and structures on their roofs. In the foreground, there is a paved area with a red forklift and a person walking. A dark grey semi-transparent rectangle is overlaid in the center, containing the company logo and name.

INSPECTION, SELECTION AND REWORK

The primary objective is to maintain and increase the quality of its products and operations, for this reason we rely on qualified personnel to face the demands and competencies of the market. Specialized in the manufacturing industry in the area of quality control, inspection, selection and reworking of raw materials, sub-sensors and finished product for the industry in general.

INSPECTION

visual exploration of units of a batch, as well as its components and materials to see if they comply or not with the specified requirements.

SELECTION

separate the material according to its status, whether compliant or non-compliant, disposing of it following instructions and parameters indicated by our clients.

REWORK

we modify the physical characteristics of the product following the guidelines granted by our client, so that the product can be used in your processes.

DEGREASING PARTS AND CONTAINERS

THE PROCESS WE USE IS DETERMINED BY FACTORS LIKE:

- Characteristics of the oil, grease or dirt to be cleaned.
- Type of material.
- Dimensions and shape.
- Degree of cleaning required.
- Impact on the environment (legal / regulatory stipulations).
- Economic cost.
- Amount of pieces.
- Management of the pieces in the different stages of your treatment.
- Requirements of the treatment of the pieces in the stages later.
- Its possible impact on the worker's health in the event of using liquids (toxicity of chemical products, legal / regulatory stipulations).
